The

Geophysical Journal

of the

Royal Astronomical Society

Volume 10

Covering the period
1965 September to 1966 April

Published for the Royal Astronomical Society by
Blackwell Scientific Publications · Oxford

INDEX

PAGE

Andersen, F. & K. Whitham, Magneto-telluric experiments in northern Ellesmere Island 317
Ashour, A. A., The coast-line effect on rapid geomagnetic variations 147
Ashour, A. A. & S. Chapman, The magnetic field of electric currents in an unbounded plane sheet, uniform except for a circular area of different uniform conductivity 31
Ashour, A. A. & A. T. Price, Night-time Earth currents associated with the daily magnetic variations 1
Banerjee, Subir K., Exchange anisotrophy in intergrown maghemite and haematite 449
Båth, M. & S. Crampin, Higher modes of seismic surface waves: mode separation .. 81
Bhattacharji, J. C., Modified form of Earth model gravity anomaly for use in Stokes's integral 221
Bondi, H. & L. Marder, The integration of the equations of planetary constitution .. 69
Bowden, K. F., & S. H. Sharaf El Din, Circulation, salinity and river discharge in the Mersey estuary 383
Bullard, E. C. Effect of the oceans on geomagnetic variations 553
Bullen, K. E., Allowance for seismic velocity gradient in a horizontally layered flat Earth 45
Carpenter, E. W. & P. D. Marshall, Estimates of Q for Rayleigh waves 549
Chapman, S. & A. A. Ashour, The magnetic field of electric currents in an unbounded plane sheet, uniform except for a circular area of different uniform conductivity 31
Collinson, D. W., The remanent magnetization and magnetic properties of red sediments 105
Constantinescu, Liviu, Ruprechtova, L. & D. Enescu, Mediterranean-Alpine earthquake mechanisms and their seismotechtonic implications 347
Cook, A. J., On the determination of the even zonal harmonics in the external gravitational potential of the Earth 181
Cook, G. E. & D. G. King-Hele, The even zonal harmonics of the Earth's gravitational potential 17

Continental Structure:
Remarks on crustal structure in Iceland, Trausti Einarsson 283
——, Seismic studies of the Earth's crust in Continents. I: Evidence for low-velocity zone in the upper partof the lithosphere, S. Mueller & M. Landisman .. 525
——, Seismic studies of the Earth's crust in continents. II: Analysis of wave propagation in continents and adjacent shelf areas, M. Landisman & S. Mueller 539
Crampin, S. & M. Båth, Higher modes of seismic surface waves, mode separation .. 81
Dewart, G. & M. Nafi Toksöz, Crustal structure in East Antarctica from surface wave dispersion 127
Durney, B., Stresses induced in a purely elastic Earth model under various tectonic loads 163

Earth—Gravity field:
The even zonal harmonies of the Earth's gravitational potential, D. G. King-Hele & G. E. Cook 17
——, Modified form of Earth model gravity anomaly for use in Stokes's integral.. 221

Earth—Physics of the Interior of:
Stresses induced in a purely elastic Earth model under various tectonic loads, E. Durney 163
——, The effect of triaxial stress systems on the strength of rocks at atmospheric temperatures, S. A. F. Murrell 231
Einarsson, Trausti, Remarks on crustal structure in Iceland 283

PAGE

Enescu, D., Liviu Constantinescu & L. Ruprechtova, Mediterranean–Alpine earthquake mechanisms and their seismotectonic implications 347
Fielder, G., Convection in the Moon: a boundary condition 437

Geodesy:
Transformation of tesseral harmonics under rotation, Bertha Jeffreys .. 141
——, On the determination of the even zonal harmonics in the external gravitational potential of the Earth, A. H. Cook 181

Geomagnetism:
Night-time Earth currents associated with the daily magnetic variations, A. A. Ashour & A. T. Price 1
——, The magnetic field of electric currents in an unbounded plane sheet, uniform except for a circular area of different uniform conductivity, A. A. Ashour & S. Chapman 31
——, The coast-line effect on rapid geomagnetic variations, A. A. Ashour 147
——, Geomagnetic core–mantle coupling and the Chandler wobble, M. G. Rochester & D. E. Smylie 289
——, Magneto-telluric experiments in northern Ellesmere Island, K. Whitham and F. Andersen 317
Groves, G. W., W. H. Munk & B. Zetler, Tidal cusps 211
Havard, A. D. & M. Lewis, Reversed partial thermo-magnetic remanence in natural and synthetic titano-magnetites 59
Hughes, P., The temperature and salinity of the surface waters of the Irish Sea for the period 1947–61 421
Hudson, J. A. & H. Jeffreys, On very long Love waves 175
Irving, E., L. Molyneux & S. K. Runcorn, The analysis of remanent intensities and susceptibilities of rocks 451
Jeffreys, Bertha, Transformation of tesseral harmonics under rotation 141
Jeffreys, Sir Harold & J. A. Hudson, On very long Love waves 175
Jeffreys, Sir Harold & M. Shimshoni, The use of amplitudes in improving velocity distributions for Europe.. 515
Kaufman, H., Remark on the exponential velocity–depth function 551
King-Hele, D. G. & G. E. Cook, The even zonal harmonics of the Earth's gravitational potential 17
Kume, S., Effect of uni-directional pressure on chemical remanent magnetization of α-haematite. 51
Landisman, M. & S Mueller, Seismic studies of the Earth's crust in continents. I: Evidence for low-velocity zone in the upper part of the lithosphere .. 525
Landisman, M. & S. Mueller, Seismic studies of the Earth's crust in continents. II: Analysis of wave propagation in continents and adjacent shelf areas .. 539

Letters to the Editors:
Comments on detecting changes in the Earth's radius, M. A. Ward .. 445
——, Exchange anisotrophy in intergrown maghemite and haematite, Subir K. Banerjee 449
——, Estimates of *Q* for Rayleigh waves, P. D. Marshall & E. W. Carpenter .. 549
——, Remark on the exponential velocity–depth function, H. Kaufman 551
——, Effect of the oceans on geomagnetic variations, E. C. Bullard 553
Lewis, M. & A. D. Havard, Reversed partial thermo-magnetic remanence in natural and synthetic titano-magnetites.. 59

Magnetic properties of rocks:
Effect of uni-directional pressure on chemical remanent magnetization of α-haematite, S. Kume 51
——, Reversed partial thermo-magnetic remanence in natural and synthetic titano-magnetites, A. D. Havard & M. Lewis.. 59
——, The remanent magnetization and magnetic properties of red sediments, D. W. Collinson 105
——, An improved method for demagnetizing rocks in alternating magnetic fields, M. W. McElhinny 369
——, Further correlations between the petrology and the natural magnetic polarity of basalts, R. L. Wilson 413
Manchee, E. B. & H. Somers, Selectivity of the Yellowknife seismic array 401
Marder, L. & H. Bondi, The integration of the equations of planetary constitution .. 69

PAGE

Marshall, P. D. & E. W. Carpenter, Estimates of *Q* for Rayleigh waves 549
McElhinny, M. W., An improved method for demagnetizing rocks in alternating magnetic fields 369
McElhinny, M. W., The palaeomagnetism of the Umkondo Lavas, eastern Southern Rhodesia 375
Molyneux, L., E. Irving & S. K. Runcorn, The analysis of remanent intensities and susceptibilities of rocks 451

Moon—Physics of the:
Convection in the Moon: a boundary condition, G. Fielder 437
Mueller, S. & M. Landisman, Seismic studies of the Earth's crust in continents. I: Evidence for low-velocity zone in the upper part of the lithosphere .. 525
Mueller, S. & M. Landisman, Seismic studies of the Earth's crust in continents. II: Analysis of wave propagation in continents and adjacent shelf areas .. 539
Munk, W. H., B. Zetler & G. W. Groves, Tidal cusps 211
Murrell, S. A. F., The effect of triaxial stress systems on the strength of rocks at atmospheric temperatures 231
Nafi Toksöz, M. & G. Dewart, Crustal structure in East Antarctica from surface wave dispersion 127

Oceanography:
Tidal cusps, W. H. Munk, B. Zetler & G. W. Groves 211
——, Circulation, salinity and river discharge in the Mersey estuary, K. F. Bowden & S. H. Sharaf El Din 383
——, The temperature and salinity of the surface waters of the Irish Sea for the period 1947–61, P. Hughes 421

Palaeomagnetism:
The palaeomagnetism of some of the Hawaiian islands, D. H. Tarling .. 93
——, The palaeomagnetism of the Umkondo Lavas, eastern Southern Rhodesia, M. W. McElhinny 375
——, The analysis of remanent intensities and susceptibilities of rocks, E. Irving, L. Molyneux & S. K. Runcorn.. 451
——, The palaeomagnetism of the Samoan and Tongan islands, D. H. Tarling .. 497

Planets:
The integration of the equations of planetary constitution, H. Bondi & L. Marder 69
Price, A. T. & A. A. Ashour, Night-time Earth currents associated with the daily magnetic variations 1
Rochester, M. G. & D. E. Smylie, Geomagnetic core–mantle coupling and the Chandler wobble.. 289
Runcorn, S. K., E. Irving & L. Molyneux, The analysis of remanent intensities and susceptibilities of rocks 451
Ruprechtova, L., Liviu Constantinescu & D. Enescu, Mediterranean–Alpine earthquake mechanisms and their seismotectonic implications 347

Seismology:
Allowance for seismic velocity gradient in a horizontally layered flat Earth, K. E. Bullen 45
——, Higher modes of seismic surface waves: mode separation, S. Crampin & M. Båth 81
——, Crustal structure in East Antarctica from surface wave dispersion, G. Dewart & M. Nafi Toksöz 127
——, On very long Love waves, Sir Harold Jeffreys & J. A. Hudson 175
——, Mediterranean–Alpine earthquake mechanisms and their seismotectonic implications, Liviu Constantinescu, L. Ruprechtova & D. Enescu.. .. 347
——, Selectivity of the Yellowknife seismic array, H. Somers & E. B. Manchee .. 401
——, Pressure and shear waves generated by an explosion in an elastic sphere, G. E. Tanyi 465
——, Rayleigh waves generated by an explosion in an elastic sphere, G. E. Tanyi.. 485
——, The use of amplitudes in improving velocity distributions for Europe, Sir Harold Jeffreys & M. Shimshoni 515
Sharaf El Din, S. H. & K. F. Bowden, Circulation, salinity and river discharge in the Mersey estuary 383
